GREETINGS FOR 1952

I cannot do the big things
That win the world's acclaim,
So I don't know how I would feel
To have cheers greet my name.
But I can take a few brown bulbs
And place them 'neath the sod,
And on some April mornng
Feel a little bit like God.

—A. H. Post.

Another flower season is drawing near with the opportunity to extend Greetings to my friends and customers "old and new."

One of the most difficult things in the world to do is to express one's feelings in mere words but I would like to convey my sincere thanks and appreciation to you. Your friendship and loyalty mean so much to me. I enjoy the personal contact with so many of you each fall when you visit my flower garden. Thanks again and all good wishes.

Although we had to dig the dahlias out of ankle deep mud, I never had finer roots and lots of them—but order early—I never seem to have enough of some kinds. Tell me when you want your roots and bulbs and I will try to send at that time.

Parcel Post rates are higher again so I am forced to add a little to the price of my COLLECTIONS to help pay postage but you will find my prices lower on many varieties of dahlias.

All bulbs and plants are state inspected—guaranteed true to name, and to reach you in good growing condition. If not satisfied, let me know at once, and I will make adjustment.

All orders amounting to \$1.25 or more are sent post-paid—if less than \$1.25 please add 10c for postage. Stamps accepted for orders of less than \$1.00.

READ BEFORE ORDERING

If you live west of the Rockies and order dahlias—please add 50c to your order to help pay for "special inspection" which is required under the new plant laws.

A FEW POINTERS ON DAHLIA CULTURE

Plant tubers 4 to 6 inches deep and about three feet apart in well worked soil. I usually plant from May 20th to June 10th. Do not plant near buildings or trees—they do best in full sun. Keep top soil stirred, allow no crust to form and keep free of grass and weeds. Do not water unless very dry—then soak thoroughly once a week—a slight sprinkling will do more harm than good. As the buds develop in groups of three—remove the two side buds leaving only the middle or terminal bud and you will have large flowers with longer stems.

AMARYLLIS

Bright red with white stripe. Blooms in

March. Large bulbs.....60c

HARDY AMARYLLIS (*Lycoris squamigera*)—Also called “Magic Lily.” Has green foliage in early spring which disappears by July. In August the flower stalks shoot up to a height of two feet or more with an umbel of beautiful lilac-pink flowers. Very hardy. Large bulbs.....65c
